

PLEASE CONSIDER BROWNS STOCKFEED FOR ALL YOU AUTUMN/WINTER ANIMAL HEALTH REQUIREMENTS

MINBAL 4 IN 1 - **\$7.75 ea**
18 PACK BOX - **\$135** (@ \$7.50 ea)

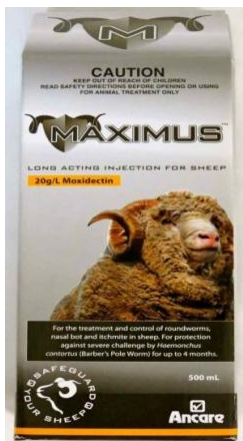

CYDECTIN 5 LITRE
\$460.00

MAGFERTET GRASS TETNANY
20 KG BLOCKS
\$26.00

Be prepared for Milk fever and have **Minbal 4 in 1** on hand. **Magfertet** is a new block on the market that is high in magnesium, molasses based for palatability and weather resistant. Magfertet is one of the only blocks on the market that is 20 kgs that helps prevent Grass Tetany.

Give your ewes the best opportunity to produce you quality lambs, by giving them a **Maximus** pre-lambing. The sustained activity of **MAXIMUS LA** prevents the reinfection of stock with susceptible parasitic Barber's Pole worm and small brown stomach worm larvae for 91 days, and for up to 49 days for black sour worm. For this reason, **MAXIMUS LA** may be of benefit to susceptible stock under challenge from reinfection, including lambs during the post-weaning period and ewes during lactation. For more information please drop into the store or give Tim a ring.

MAXIMUS (Long Acting) – 500ML - **\$230.00**

Please consider us for all your Farm Requirements

- Fencing - Electric Fencing - Pasture Seeds - Pasture Chemicals - Animal Health - Drenches - Vaccines - Spraying Equipment - Water Pipe and Fittings - Troughs - Cattle Handling Equipment - Wet Weather Clothing & Boots

NOT FORGETTING ALL YOUR LIVESTOCK FEED REQUIREMENTS

Multimin is an Injectable source of zinc, manganese, copper and selenium – significantly increases the trace mineral status of cattle. It's ideal for topping up trace minerals prior to critical events (eg; joining, calving, marking, weaning) when demand may increase. It provides traces of mineral essentials for optimal health, production and fertility and contains four traces of minerals in a convenient, water based injection.

MULTIMIN INJECTION 500 ML - \$315.00

BROWNS STOCKFEED also have all your Calf Rearing requirements. From the MaxCare milk powders, calf pellets/ mixes and our very popular Long Fibre calf mix.

Browns also have a range of feeders, teats & supplements.

DON'T LET FLAT WEEDS REDUCE THE PRODUCTIVITY OF YOUR PASTURES

Nugrex is a Selective Herbicide for the control of certain broadleaf weeds in clover pastures. Nugrex used at the correct rate will kill capeweed outright, while at the same time being the kindest herbicide of its kind on clover. Nugrex also offers outstanding activity of up to 4 weeks against Wild Radish. The rate being used at the moment is 750 ml/ha, which works out to \$9.93/ha.

NUGREX 20 LITRES - \$265.00

Amicide Advance 700 is the newest and strongest formulation available. Amicide (Amine) is a very common spray in the area and has been used with great success. The label rate for capeweed is 1.5 L/Ha, which works out to \$10.65/ha.

AMICIDE ADVANCED 700 - \$142.00
