

Browns Nickel Dairy Pellets

Browns Nickel Dairy Pellet is a durum wheat based feed, ideal to be fed all year round, to all classes of livestock, dairy, beef, sheep and goats.

The amino acid profile enables this pellet to perform above nutrient specification, as well as supplying effective fibre and energy to livestock.

A specific Vitamin & Mineral Premix can be added at customer's request to Browns Nickel Dairy Pellet to further enhance livestock performance.

Browns Nickel Dairy Pellet is a direct replacement for Unprocessed Cereal Grains - Barley and Wheat. The steaming process results in gelatinization of starch enhancing digestibility and nutrient uptake.

Browns Nickel Dairy Pellet is designed to be fed from 1 to 8 kilos depending on the class of livestock.

WHAT ARE THE INGREDIENTS AND SPECIFICATIONS?

Analysis	(DM Basis)
Nutrient	Amount
Crude Protein (Min.)	18%
Metabolisable Energy (min.)	13.5%
NFD	28%
Crude Fat (max)	3%
Starch (min)	35%

Ingredients From:

Durum Wheat, Millrun & Bentonite.
