

BROWNS STOCK FEED

PTY LTD.

HEIFER PELLET

Browns Heifer Pellet are a high protein and energy ration that are ideal to feed calves from 3 months up until the transition phase. These pellets have been formulated to avoid digestive upsets through careful management of protein and energy sources. They are high in by-pass proteins to increase the amount of true protein available to the heifer to be used for growth and tissue development.

Browns Heifer Pellet contains **Bovatec®** which is used in the prevention of coccidiosis. Coccidiosis can severely reduce calf performance and delay efficient rumen development. **Bovatec®** also improves feed conversion efficiency by providing more energy to the rumen. Use when pasture conditions are inadequate to support growth of around .75kg per day. Recommended feed rate is **4-5kg/h/day**. A young heifer needs nutrient concentrate of at least 17% CP, 13 MJ ME/kg DM to achieve target growth rates.

Transition Feeding Plan:

Days 0-7	Days 8-14
Offer 1-2kg pellets	Offer 3-4kg pellets
Adlib fibre	Adlib fibre

Always Ensure:

- Wet Pellets removed & discarded
- Adlib fibre & fresh clean water is provided at all times
- Adequate shelter is available

Ingredients From:

Wheat, Barley, Canola Meal, Canola Seed, Maize/Corn, Milled Almond Hulls, Lupins, Limestone, Salt, Acid Buf™, Magnesium, Vitamin & Mineral Premix & Bovatec®

NUTRIENT	AMOUNT
Crude Protein (min)	17%
Metabolizable Energy (min)	13%
Starch (min)	45%
Crude Fat (max)	5%
Magnesium (min)	0.5%
Calcium (min)	1.5%
Phosphorus (min)	0.5%

PLEASE NOTE: Not to be fed to any other classes of livestock eg; Horses, Alpacas, dog, goats, and chickens. Non Ruminant Species. As it may be FATAL.
